

PKI KNOCKOUT MACHINE

Enter a New Era of Casting Knockout

Manufactured by Pacific Kiln & Insulations Co. Inc. (PKI), the knockout machine allows you to get rid of the sledge hammer and enter a new era of casting knockout. It is specifically designed to quietly, safely and efficiently remove the shell from an investment casting; and in a fraction of the time.

The knockout machine is a cabinet-enclosed pneumatic cylinder that clamps the tree tightly while the air hammer vibrates ceramic material loose. The cabinet is sound insulated to provide a quiet shell removal environment.
